Innovative Construction & Insulation Solutions

Lightweight Shower (XPS) Tray

Light & Easily Installed Shower Tray

Marmox lightweight shower trays are made from extruded polystyrene (XPS) and are pre-graded to the waste outlet, making shower construction quick and easy! They're designed for installation onto any type of structural flooring.

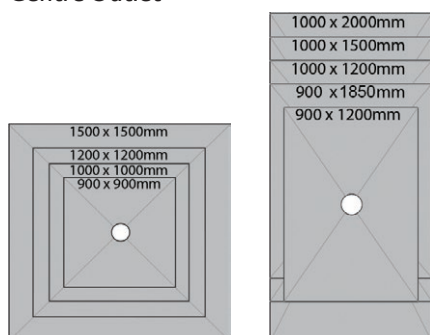

Marmox Shower Trays are available in a variety of sizes which are suitable for almost any type of shower and may be extended or trimmed to fit the specific requirements of your job. They're lightweight and allow for easy one-person installation.

Highlights

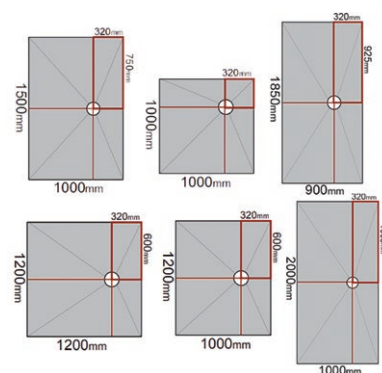

- Lightweight
- Pre-graded to waste outlet
- May be trimmed or extended
- Easy installation
- Available in various sizes and drainage offsets

Available Sizes:

Centre Outlet

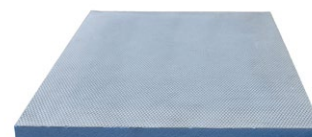

Offset Outlet

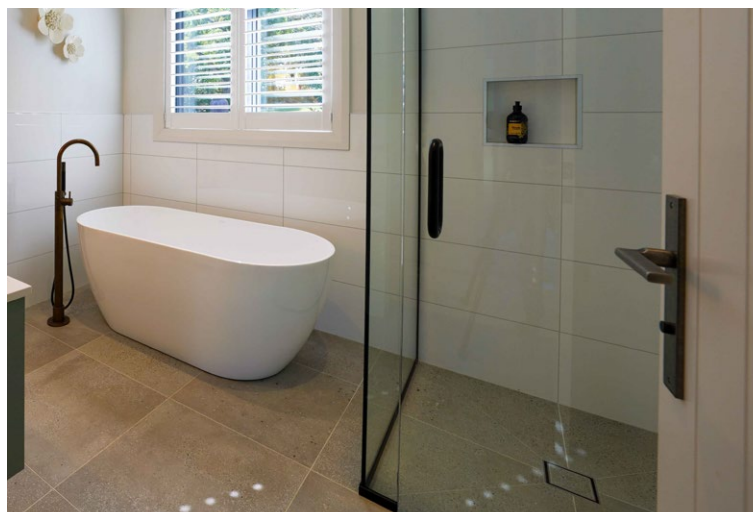

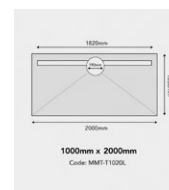

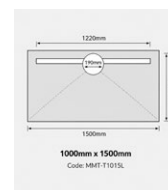

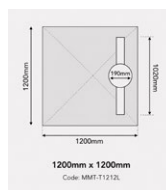

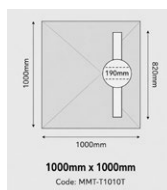

XPS Shower Tray Extensions

Available Sizes:

600mm x 1000mm
(25mm to 35mm)

Trough Sizes:

Stone Shower Tray

Sturdy & Easily Installed Shower Tray

Marmox Stone Shower Trays are made of polymer (acrylic) modified concrete which, like their XPS counterparts, are pre-graded to the waste outlet.

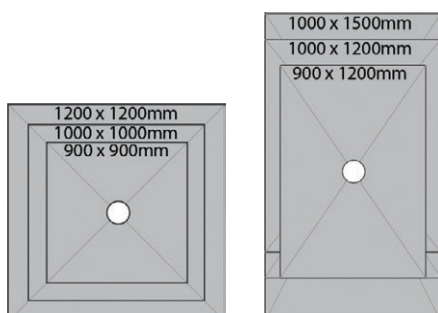

The Solid Stone Underlay is classified as self-supporting and may be placed directly onto floor joists (with appropriate spacing and support).

Highlights

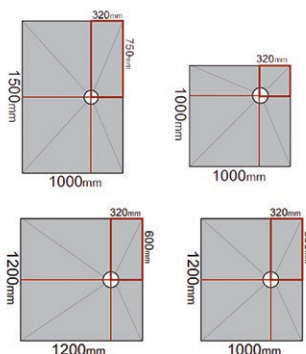

- Self Supporting
- Pre-graded to waste outlet
- May be trimmed using a diamond blade
- Easy installation
- Available in various sizes and drainage offsets

Available Sizes:

Centre Outlet

Offset Outlet

Multiboards

Build your Bathroom & Wet Areas with Marmox Boards

Marmox Boards are made from XPS extruded polystyrene foam bonded with layers of fibreglass reinforced polymer cement. The surface of reinforced polymer cement is perfect for tile adhesion, waterproofing or plastering. Marmox Boards are difficult to bend, bow or distort compared to plasterboard.

Marmox Boards are perfect for use in all wet areas as both floor sheeting and wall sheeting as they will not absorb water and provide great thermal insulation.

With excellent thermal insulation properties, Marmox Multiboards also help reduce heat loss and improve energy efficiency. They are widely used with underfloor heating systems and are also suitable for walls and ceilings where thermal performance is required.

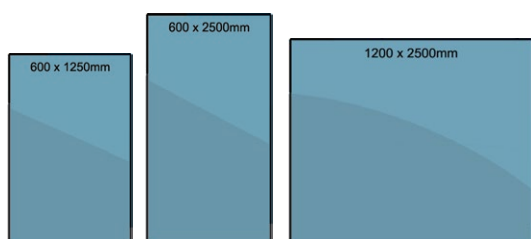

Highlights

- High compressive strength (withstand 30 t/m²)
- Will not break or rot
- Completely water-resistant
- Excellent heat insulation
- Sound insulation (20 decibels)
- High U-value (2.7 W/m²k for 10mm)
- Extruded polystyrene closed cell structure retains R-value even in moist conditions
- Easy to cut with a knife or saw.
- Light weight. 10mm board is only 3kg/m²
- Marmox is environmentally friendly, CFC and HCFC free

*Not recommended for vinyl

Available Sizes:

- | | |
|---------------------|----------------------|
| • 600 x 1250 x 6mm | • 600 x 2500 x 20mm |
| • 600 x 1250 x 10mm | • 600 x 2500 x 30mm |
| • 600 x 1250 x 20mm | • 600 x 2500 x 40mm |

Curved Boards

Save Time & Effort with Flexible Marmox Curved Boards

If you are searching for bathroom and wet room design ideas, Marmox Curved Boards can open up a range of exciting options. They can be used to clad, waterproof and insulate archways and curved walls, and also to create curved partition walls, curved bathroom panels, moulded tiled seats, round or curled cubicles etc.

Curved Boards are Marmox Boards of 20mm thickness which have slits 2mm wide and 17mm deep removed from one side of the board at 20mm intervals. This allows them to be folded in on themselves to create a radius as small as 200mm.

Highlights

Light weight. 10mm board is only 3kg/m²

- High compressive strength
- Completely water-resistant
- Excellent heat insulation
- Environmentally friendly
- Sound insulation (20 decibels)

Available Sizes:

- Longitudinal 600mm x 2500mm x 20mm
Slits along 2500mm length
- Transverse 600mm x 1250mm x 30mm
Slits along 1250mm length

When secured against a frame or a curved wall, they present a low porosity cement curved surface which is ready for either waterproofing, tiling or plastering. Radii tighter than 200mm can also be created with Marmox Curved boards by folding the board in the opposite direction so that the "teeth" are opened. Please contact us on how to use this method.

Sloping Boards

Add a Slope to your Shower Area

Marmox Sloping Boards are an ideal, lightweight solution for balconies which require drainage in a single direction and for extending a Marmox Lightweight Shower Tray beyond their regular size.

The sloping board may be combined with Marmox Boards to extend the slope as much as is required. If a shower has linear drainage against a wall, this sloping board also functions as an underlay.

Highlights

- Lightweight
- One-way sloping boards
- Indefinite slope extension
- Can be used for Lightweight Shower Tray extension

Available Sizes:

1200mm x 1200mm (10mm to 33mm)

Bath Panels

Waterproof Tile Foundation for Baths

Marmox Bath Panels are easy to fit surround panels for built-in baths. One of the most simple to use products on the market, our bath panels make for quick and easy installation.

These are easy to fit surround panels that are designed to fit built-in baths. Like all Marmox Construction Board products, Marmox Bath Panels are fully water-resistant. Marmox Bath Panels are easy to cut to your exact fitting requirements, and installation is quick and simple. Once installed, they're ready to be waterproofed and and/or tiled as desired.

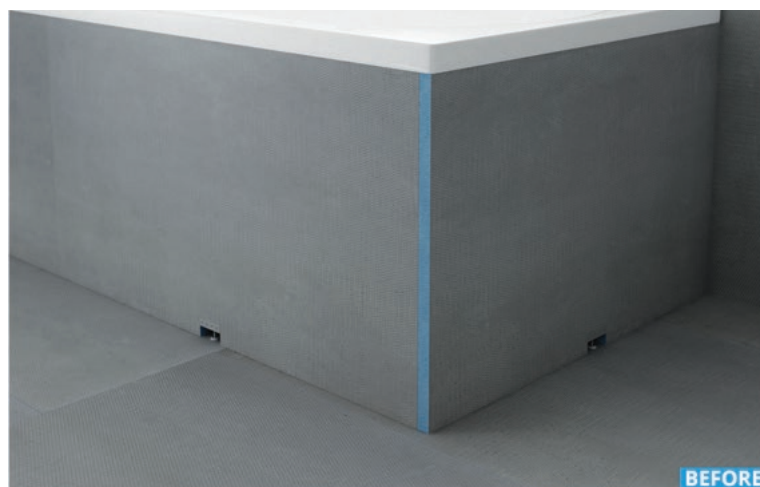

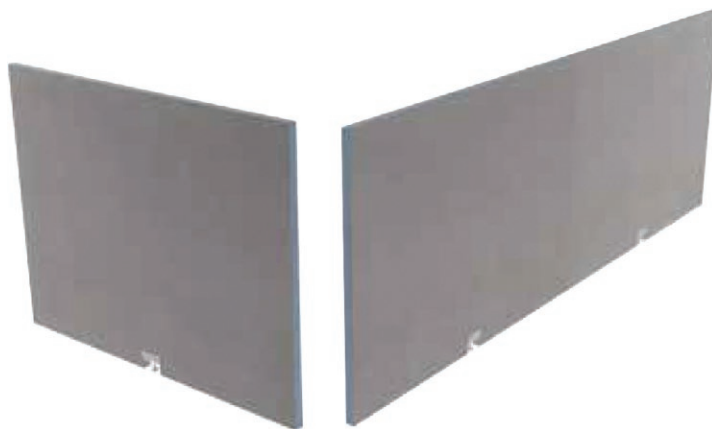

Highlights

- Simple to install
- Easily cut to size
- Adjustable feet
- Ready to tile
- Fully water-resistant
- Lightweight

Available Sizes:

Included in a Marmox Bath Panel kit is the following:

- 1x 600mm x 1800mm x 30mm Marmox Board
- 1x 600mm x 800mm x 30mm Marmox Board
- 3x adjustable feet already fitted to the panels

BEFORE

AFTER

Pipe Boxing

An Elegant Pipe Covering Solution

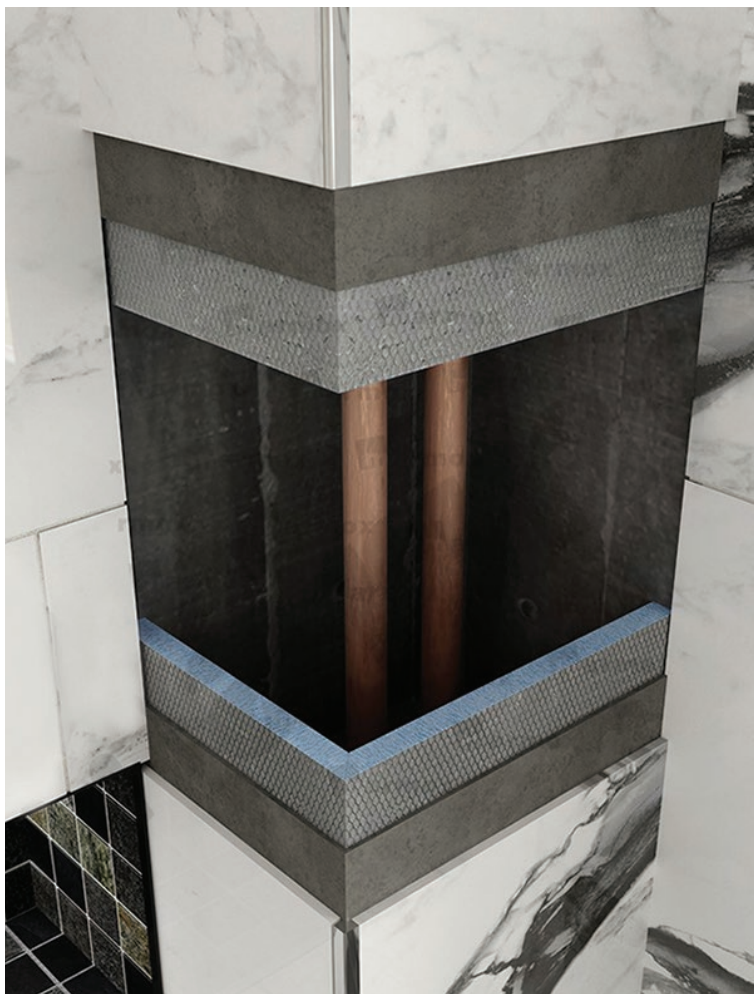

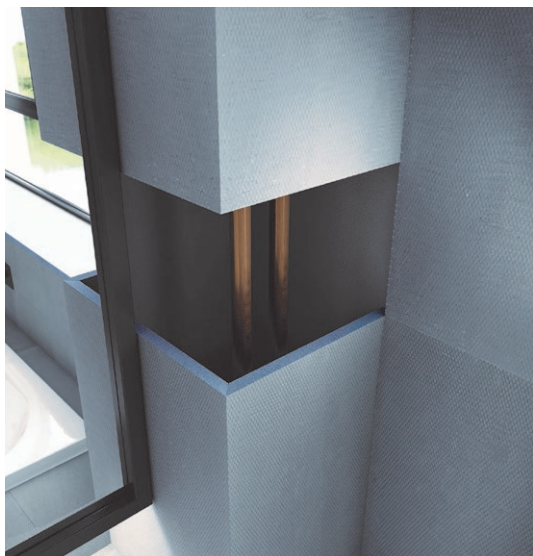

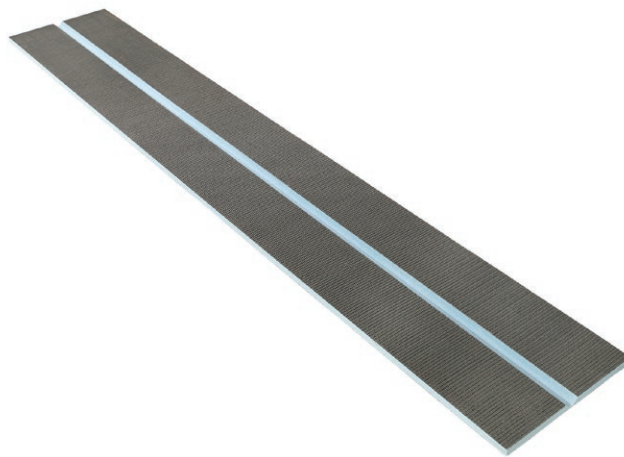

Specially designed to enable easy, fast and clean boxing-in of exposed pipe work. Marmox Pipe Boxings are completely water-resistant, so they are suitable for showers and wet rooms, as well as bath panels and can also be used for shelving solutions.

Highlights

- Simple to install
- Easily cut to size
- Ready to tile
- Fully water-resistant
- Lightweight

Available Sizes:

- 150 x 150 x 2500mm
- 300 x 300 x 2500mm
- 200 x 400 x 2500mm

Concealed Toilet Boards

Easy to Install Cladding

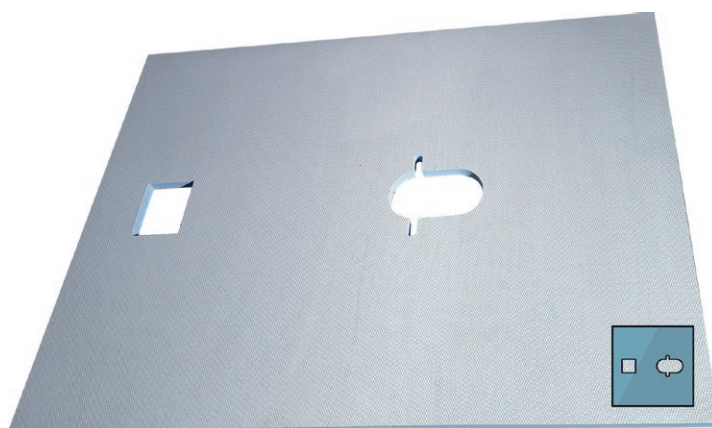

This Toilet Board support frame cladding is practical, easy to install and economical. Designed with a 155cm x 120cm plate, this product is water-resistant and ready to tile.

Highlights

- Economical
- Easy to install
- Ready to tile
- Compatible with all frames
- Can be cut to any height

Available Sizes:

- 1200mm x 1550mm x 20mm

Concealed Frame Toilet Boxes

Panel Kit Adjusts to All Situations

Installing a toilet box has never been easier, faster or simpler than with our unique Marmox Toilet Box designed for any support frame.

The Marmox Toilet Box is a unique solution made from our revolutionary fully water-resistant, lightweight XPS "Marmox Construction Boards".

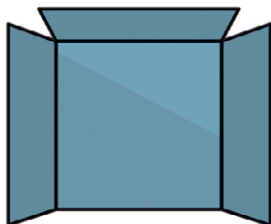

Highlights

- Water-resistant
- Lightweight
- Time saving
- Easily Installed
- Ready to tile

Available Sizes:

- 600mm x 1250mm x 20mm kit

20 x 600 x 1250mm

Shower Niches

Creating Extra Spaces in Showers

If you are currently giving some thought to wet room design ideas, a shower niche is an elegant way to provide extra space for small shower items. The Marmox Shower Niche provides a low-cost, easily installed and completely waterproof option.

These shower niches are comprised of an extruded polystyrene core coated on either side with a thin but robust layer of fibreglass reinforced polymer cement.

Their ease of use, practical benefits and elegant appearance make Marmox Shower Niches the perfect addition to your shower.

Shower niches are very practical and easy to install when wet rooms are being built and work exceptionally well with Marmox Construction Boards wall sheeting.

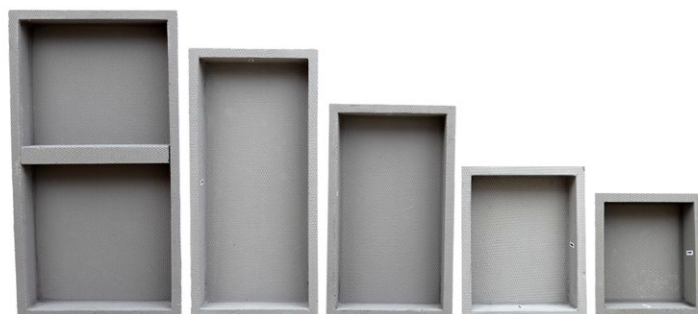

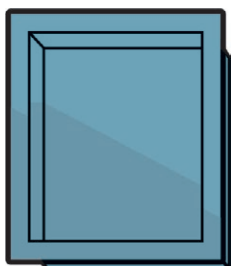

Highlights

- Comes already constructed which guarantees the conformity and size
- Lightweight and easy to work with
- Ready to waterproof and then tile
- Provides thermal insulation
- Fit walls with cavities 86mm or deeper
- Can be used to form a recess for toiletries within showers and other wet areas
- Perfect for a DIY or professionally built bathroom

Available Sizes:

(Internal Dimensions)

- 300 x 260 x 800mm
- 300 x 380 x 800mm
- 300 x 550 x 800mm
- 300 x 700 x 800mm
- 400 x 800 x 800mm with adjustable shelf

SoundBoards

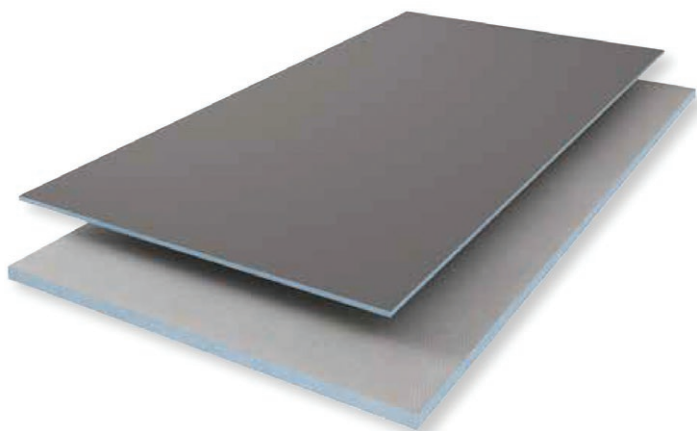

Insulated Boards to Keep Things Quiet

Marmox SoundBoard is a tile backer board which reduces the impact noise that passes through a floor into the room below. Like Marmoxboard, it provides a completely water-resistant layer, secure decoupling, thermal insulation and low compressibility but with the added benefit of effective impact sound reduction.

One side of the board is coated with a sound attenuating layer of SBR rubber that isolates the tiled surface from the floor so that there is nothing for the sound waves to travel through. The rubber compound is natural so there is no plasticiser migration ensuring the material neither shrinks, degrades nor becomes brittle. SoundBoard will reduce the level of impact noise greater than the recommended minimum of 17dB.

Highlights

- Water-resistant
- Lightweight
- Time saving
- Easily Installed
- Ready to tile

Shower Hobs

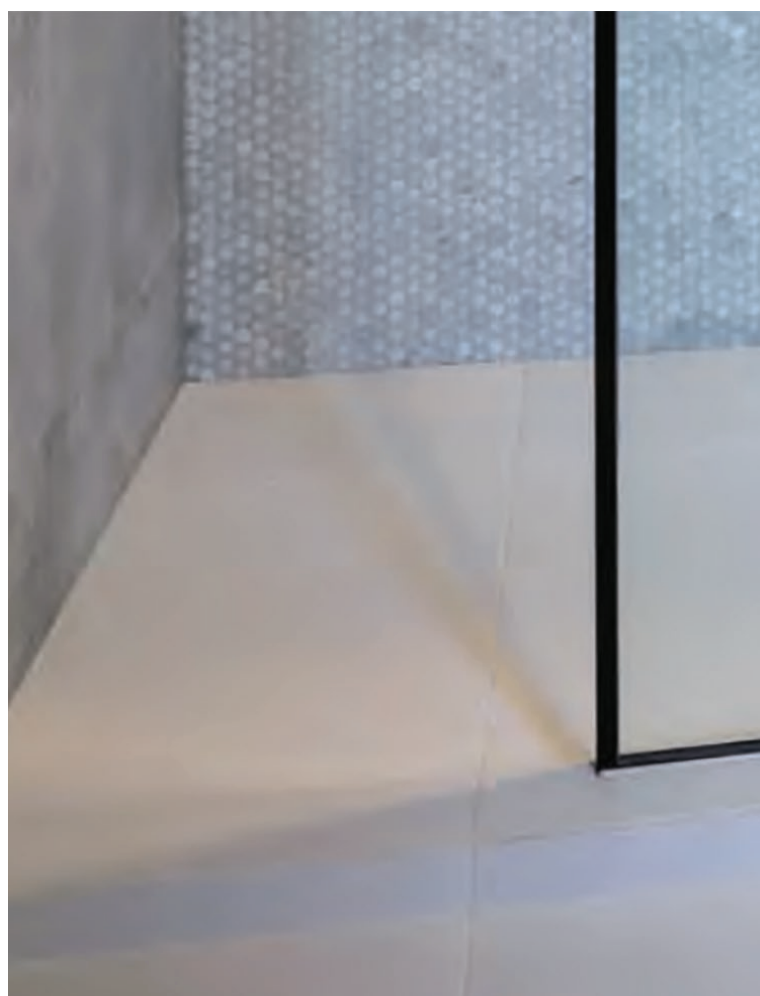

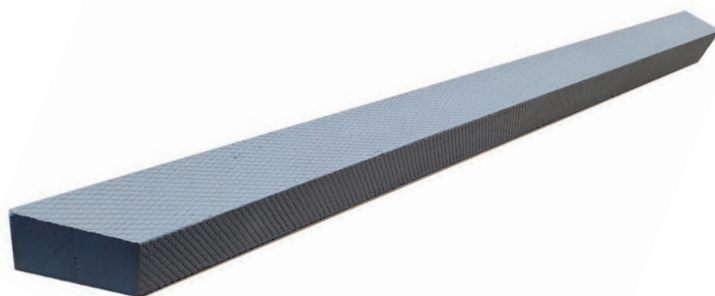

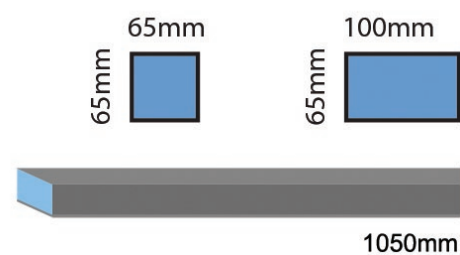

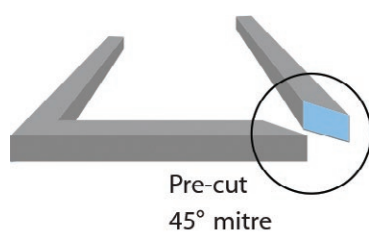

Lightweight & Revolutionary Shower Finishing Product

Marmox Shower Hobs are ideal as a lightweight alternative to traditional shower hob materials such as concrete or bricks. Marmox shower hobs are made of the same revolutionary Marmox materials, involving an XPS foam core covered in a fibreglass polymer reinforced cement which makes them both water-resistant and extremely durable.

Marmox Hobs have a 50mm mitre on them at one end, which allows for the creation of right angles quickly and easily!

Available Sizes:

- 65mm x 65mm x 1050mm
- 65mm x 100mm x 1050mm

Thermoblocks

Load Bearing Thermal Insulation Blocks

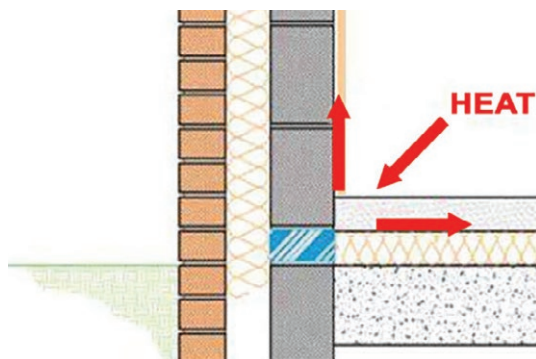

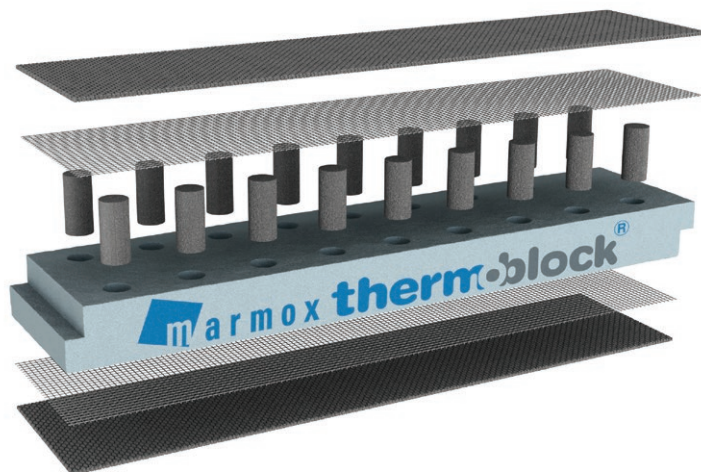

Marmox Thermoblock is a block of load-bearing insulation material designed to be placed at the base of a masonry or timber-frame wall to address the thermal bridge. Its thermal conductivity is 0.05W/mK which results in a significant reduction of γ values when used at wall to floor junctions.

Marmox Thermoblock has a shear strength of 0.18N/mm^2 and a mean compressive strength of 9N/mm^2 , allowing it to be used under most load-bearing walls. Additionally, because Thermoblock is completely impermeable to water it may be used in damp conditions without any loss of insulation properties.

Thermoblock thermal insulation products not only reduce thermal bridging, but also create a moisture barrier.

Available Sizes:

- 90/100/110/140/150/190/230mm x 600mm
- Thickness: 100mm

Accessories

A Comprehensive Range of Specialist Finishing Products

Washers

Required when screw fixing. Screw hole diameter: 5mm (plastic) / 6mm (metal).

Marmox Reinforcing Tape

A scrim tape to bridge all board junctions (except those in wet areas). Available in 20m or 90m rolls. For use when plastering.

Mounting Brackets

A simple method of positioning boards, especially useful with pipe boxing board.

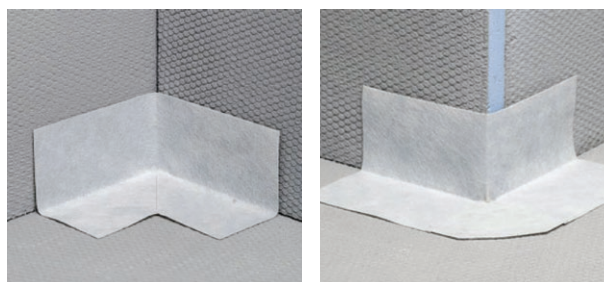

Fixing Dowels

A fast method of mechanically fixing the boards generally with the dot and dab method.

Waterproof Corner Pieces

A non-adhesive butyl based waterproof corner.

Designer Range

Sliced Stone Veneer Sheets

Natural Stone Finish, Lightweight Performance

Marmox Sliced Stone Veneer Sheets are a lightweight and visually striking cladding solution for both internal and external applications. Made from thin layers of real natural stone, they deliver the character, colour variation and texture of stone in a slim, easy-to-handle format. Their flexibility and low weight make them ideal for feature walls, fireplaces, columns and decorative surfaces where traditional stone may be too heavy or impractical.

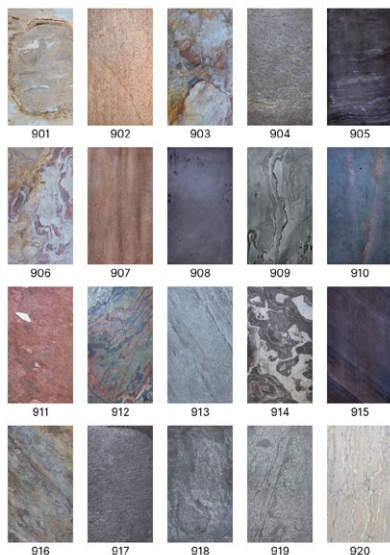

Highlights

- Real natural stone surface
- Lightweight and easy to handle
- Suitable for internal and external use
- Flexible for curved and feature applications
- Waterproof and stain-resistant surface treatment
- Each sheet is unique
- Easy to clean and maintain

Available Sizes:

- 1220 x 610mm
- 2100 x 1050mm
- 2700 x 1200mm
- Thickness: 2-3mm

Designer Range

Marmoxan

Durable, Hygienic Solid Surface Panels

Marmoxan is a premium solid surface panel range designed for applications where hygiene, durability and clean aesthetics are essential. Non-porous and easy to maintain, Marmoxan resists stains, liquids, bacterial and fungal growth, making it well suited to bathrooms, kitchens, laundries and commercial interiors. It provides a consistent, modern finish and can be integrated into a wide range of interior design applications.

Highlights

- Non-porous and hygienic
- Resistant to stains and liquids
- Resistant to bacterial and fungal growth
- Durable and impact resistant
- Easy to clean and maintain
- Seamless, modern appearance
- Suitable for wet and dry interior applications
- Can be customised to suit project requirements

Available Sizes:

- 3050 x 1000mm
- 2600 x 1000mm
- 3050 x 870mm
- 2550 x 850mm
- Available thicknesses: 6mm, 10mm, 12mm

Ready-Made Shelves and Niches

Stylish Storage Solutions for Wet Areas

Marmox Ready-Made Shelves and Niches are practical storage solutions designed to bring clean detailing and added function to bathrooms, showers, wet rooms and vanity areas. They are lightweight, waterproof and easy to integrate into wall systems, helping create recessed or open storage without the need for complex on-site fabrication. Designed for modern interiors, they combine convenience, durability and a refined finished look.

Highlights

- Waterproof and vapour resistant
- Ideal for showers, bathrooms, wet rooms and laundries
- Lightweight and easy to install
- Tile-ready options available
- Built-in falls on selected niche designs to assist drainage
- Clean, space-saving design
- Integrates with Marmox waterproofing systems

Available Sizes:

Niches

- 300 x 260 x 80mm
- 300 x 380 x 80mm
- 300 x 550 x 80mm
- 300 x 700 x 80mm
- 400 x 800 x 80mm (with adjustable shelf)

Shelves

- Multiple standard shelf shapes and sizes available, including angle shelf options.

Designer Range

Tile-Ready Basin Range

Floating Vanity Tops with a Seamless Tiled Finish

The Marmox Basin Range is a collection of suspended, tile-ready vanity tops designed to combine contemporary style with practical installation. These basins are waterproof, durable and easy to customise, allowing them to suit a wide range of bathroom layouts. Concealed stainless steel fixings create a clean floating appearance, while the tile-ready surface allows the basin to integrate seamlessly with surrounding finishes.

Highlights

- Floating vanity top design
- Waterproof and durable
- Easy to install
- Tile-ready for a seamless finish
- Can be customised to suit project requirements
- Concealed stainless steel fixing system
- Multiple basin styles and lengths available
- Suitable for residential and commercial bathrooms

Available Sizes:

Standard Basin & Vanity Range Lengths

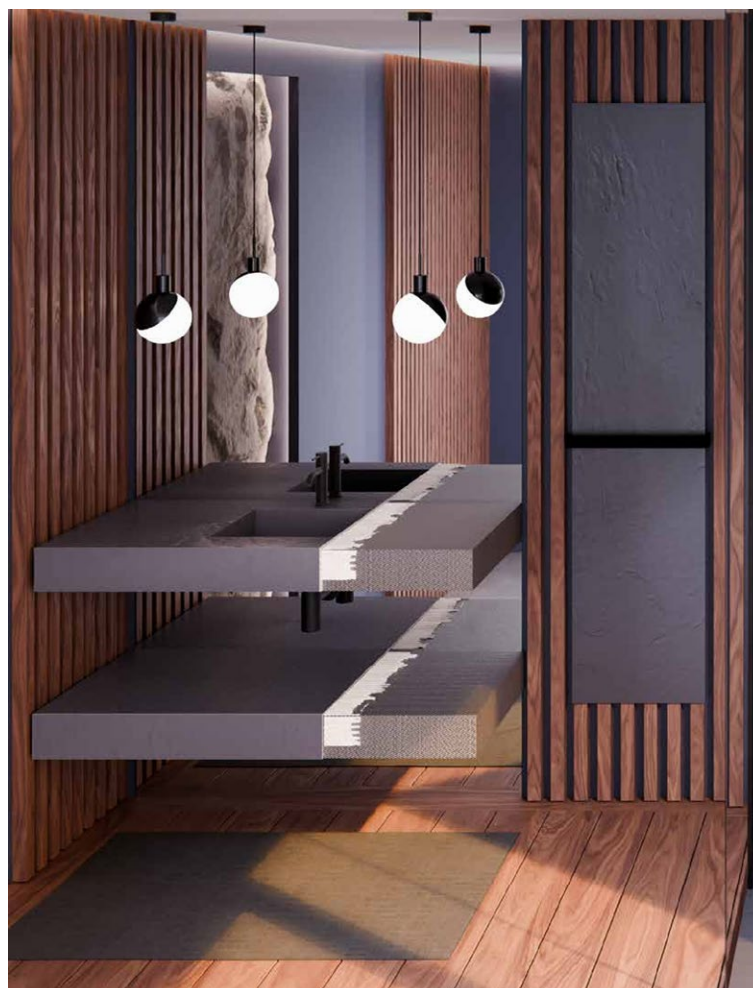

- 1170mm lengths

Channel Sink Options

- 770mm
- 970mm
- 1170mm

Thickness, Depth

- 100mm, 488mm/585mm
- Multiple basin styles are available, including Shelf Board Vanity Top, Sloped Sink Board, Square Central Sink, Square Double Sink, Square Offset Sink and Channel Sink.

Designer Range

Polyprofile

Prefabricated Profiles for Clean Architectural Finishes

Marmox Polyprofile is a specialised range of prefabricated profiles designed to create neat, durable edges, transitions and decorative detailing in interior and wet area applications. It offers designers and installers a fast, reliable way to achieve consistent lines and refined finishes without complex site fabrication. Polyprofile is suited to projects where appearance, durability and speed of installation are all important.

The range includes drip strips and skirting and coving profiles, offering practical solutions for balconies, car parks, façades, and industrial flooring applications.

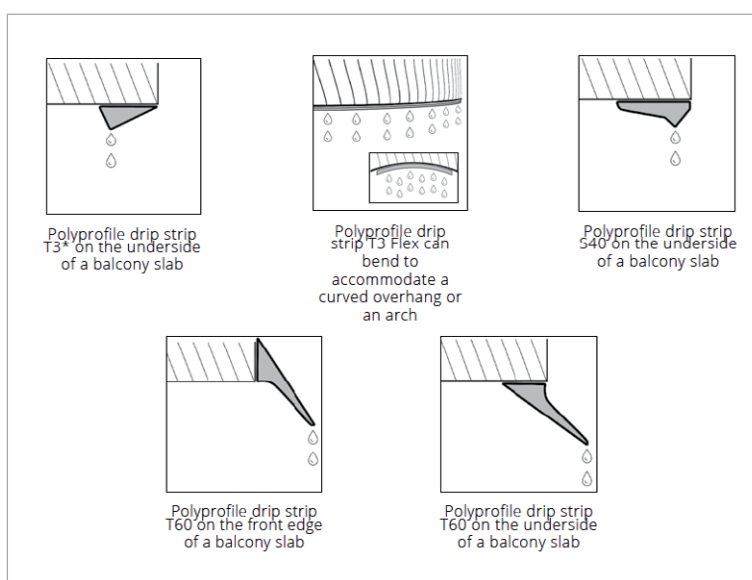

Polyprofile Drip Strips

Polyprofile drip strips are prefabricated profiles designed to function as drip edges or water noses. Installed to slab edges or undersides, they interrupt capillary water flow and direct moisture away from the structure, significantly reducing the risk of staining, concrete deterioration, and water back-tracking.

They are suitable for use on balconies, bridges, car parks, overhangs, awnings and soffits, and can be installed in both new construction and remedial works.

Drip Strip Profiles

- T3 / T3 Flex – Approx. 30 × 25 × 15 mm (H ≈ 14 mm).
- S40 – 40 × 14 mm
- T60 – 58 × 13 mm
- T20 (pre coated) – Approx. 28 × 20 × 20 mm (H ≈ 13 mm)
- T30 (pre coated) – Approx. 30 × 24 × 15 mm (H ≈ 11 mm)
- All drip strip profiles are supplied in 1 metre lengths.
- T3 Flex is manufactured using a specialised polymer concrete mix that allows controlled flexibility, making it suitable for curved edges and arches.
- Pre coated T20 and T30 profiles are finished with a durable polyurethane resin coating and are available in RAL colours for architectural detailing where a finished edge is required.

Designer Range

Polyprofile

Polyprofile Skirting and Coving Profiles

Marmox Polyprofile skirting and coving profiles are prefabricated components designed to create permanently tight, hygienic and durable floor-to-wall or wall-to-ceiling junctions.

They are commonly used in balconies, terraces, industrial floors, car parks, flat roofs, underground garages, and commercial environments where clean transitions and moisture resistance are critical

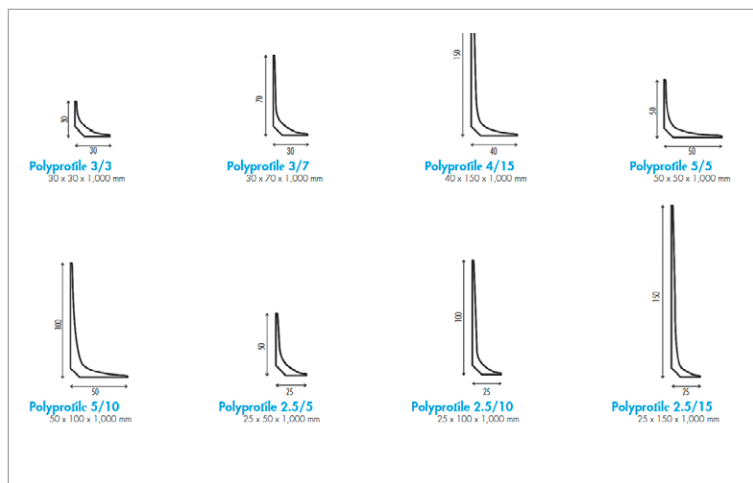

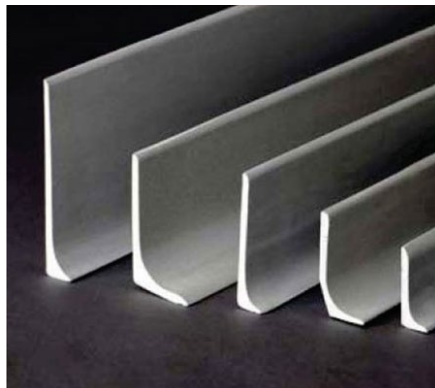

The profiles are particularly suitable for applications requiring hygienic detailing, such as food processing facilities, hospitals, and resin-coated floor systems. Available Skirting and Coving Profiles. All profiles are supplied in 1-metre lengths.

- Polyprofile 3/3–30× 30 mm
- Polyprofile 3/7–30× 70 mm
- Polyprofile 4/15–40× 150 mm
- Polyprofile 5/5–50× 50 mm
- Polyprofile 5/10–50× 100 mm
- Polyprofile 2.5/5–25× 50 mm
- Polyprofile 2.5/10–25× 100 mm
- Polyprofile 2.5/15–25× 150 mm

These profiles allow consistent detailing across varying floor build-ups and wall heights while maintaining a smooth, easy-to-clean junction.

Highlights

- Prefabricated for faster installation
- Creates clean edges and transitions
- Durable and low maintenance
- Suitable for demanding interior and wet area environments
- Helps achieve consistent, professional detailing
- Ideal for modern architectural finishes

Designer Range

Tranquillity Channel Drains

Premium Drainage Solutions for Contemporary Wet Areas

Tranquillity Channel Drains are designed to deliver both performance and visual simplicity in modern bathrooms and wet areas. Available in a variety of grate styles and finishes, they suit a wide range of tile selections and bathroom aesthetics, from clean stainless detailing to tile-insert options for a more seamless appearance. The range includes channel drains, point drains and selected compact formats to suit different project requirements.

Highlights

- Available in Linear, Mesh, Tile Insert and Solid Insert styles
- Selected ranges available in brushed stainless, matt black, brushed gun-metal and brushed brass
- Suitable for modern tiled bathrooms and showers
- Clean, architectural appearance
- Tile insert options help create a seamless finish
- Multiple sizes to suit different bathroom layouts

Available Sizes:

Channel Drains

- Tile Insert Channel Drain 800 / 1000 / 1200 / 1800mm (length) x 69mm (width) x 21mm (depth)
- Required waste flange minimum Ø50mm

Point Drains

- 110mm x 110mm x 21mm, Ø65mm
- Required waste flange minimum Ø80mm
